The orly thing they do wrong
is that they could fumble and
they don't do that too often.

BANKRUPTCY

Personal bankruptcies, according to a national newsmagazine, are "arr starming new nationwide phenomenon." A bankrupt condition doesn't descend like lightning. It has recognizable

stages.

The first is when the individual or family senses that it is overspending but doesn't bother to learn precisely where it The second stage comes when current obligations cannot be completely met and there is urgent need of cash.

The third is when the customary sources of money and goods are closed because of financial insolvency.

The best way to prevent bankruptcy is first to take stock and then to plan a financial future that includes the buildup of cash reserves through savings.
